

OZO
Smart

Multifunctional therapeutic device for ozone therapy

Ozosmart is an active multifunctional therapeutic medical device intended for application of ozone in the clinic and outpatient practice of health care facilities and it represents **the latest response the requirements of modern ozone therapy**. The device supports all currently used applications of ozone, except for stomatology.

Biochemical effects of ozone in organisms enhance a support to blood supply of all tissues including CNS, it has the bactericide, fungicide and virucide properties as well as the immune restoration effect and energy benefits, supports regeneration.

- multifunctional therapeutic device
- mobile and ergonomically and dimensionally compact solution
- touch display (intuitive control for users)
- several possibilities for setup regarding response to clients' individual requirements
- sophisticated control of nozzle flow
- multi language versions for operators

Ozosmart provides a wide range of ozone therapy spectrum:

- Major autohemotherapy
- Minor autohemotherapy
- Sampling for IM (Intra Muscular application)
- Sampling for R/V Ins. (Rectal /Vaginal Insufflation)
- Bags insufflation
- Ozonization of liquids

Ozone benefits

- Antioxidant
- Improves circulation
- Pain reliever
- Antiinflammatory effects
- Germicide (bacteria, viruses, fungi)
- Immune system stimulant
- Improves tissue oxygenation

Technical parameters	
Name of the device	Ozosmart
Source of supply	230 V/50 Hz
Input power	100 VA
Ozone concentration	1µg/ Nml - 80µg
Flow rate	0,2 or 0,8 l/min acc. to the mode
Dimensions (W x H x D)	380x340x140 mm
Weight (basic unit)	13,6 kg
Product category	II b
